RE: European Union REACH Regulation

ECO Finishing Company complies with the European Regulation concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals – REACH. REACH is the European Community Regulation on chemicals and their safe use (EC 1907/2006). The aim of REACH is to improve the protection of human health and the environment through technology and earlier identification of the properties of chemical substances.

As a supplier of product to customers that may be in the European Economic Area, we must provide a declaration that there are no substances of very high concern in the finished product. The finishes we supply will comply fully with REACH.

Should you have any questions, or if we may be of service in any way, please do not hesitate to contact us.

Thank you for your continued business.

Sincerely,

Paul Madden
Technical Director
ECO Finishing Company
